

MARISEAL® Polyurethane Roof Waterproofing

The functional & decorative waterproofing system

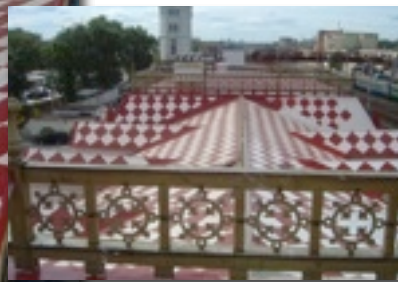

Central Train Station - Ekaterinburg Russia

The old Central Train Station in Ekaterinburg/Russia is one of the most beautiful neoclassical buildings in the city behind the Ural mountains.

When the city officials decided to waterproof the leaking roof, they chose the MARISEAL® SYSTEM that offered the unique combination of function and decoration.

The MARISEAL® SYSTEM is resistant to the very cold Russian winters, it is durable, crack-bridging, humidity
The liquid-applied, polyurethane waterproofing system, MARISEAL® SYSTEM combines everything a professional waterproofer desires:

The MARISEAL® products used for this project where:

PRODUCTS	Properties
MARISEAL® 250 	Premium, liquid-applied, highly permanent elastic, cold applied and cold curing, one component polyurethane membrane used for long-lasting waterproofing. Certified by the German state Institute for construction techniques DIBt-Berlin with the European Technical Approval (ETA) and with the CE-mark and certification.
MARISEAL® 400	Pigmented, wear resistant, hard-elastic, color- and UV-stable, weather-stable, one component aliphatic polyurethane top coat used as a protection over exposed waterproofing coatings. Offers increased wear resistance, UV and color stability and excellent chemical resistance.
